AkaSprout Seed Colorants

A technologically advanced and widely compatible dispersion line specifically designed for the agricultural market.

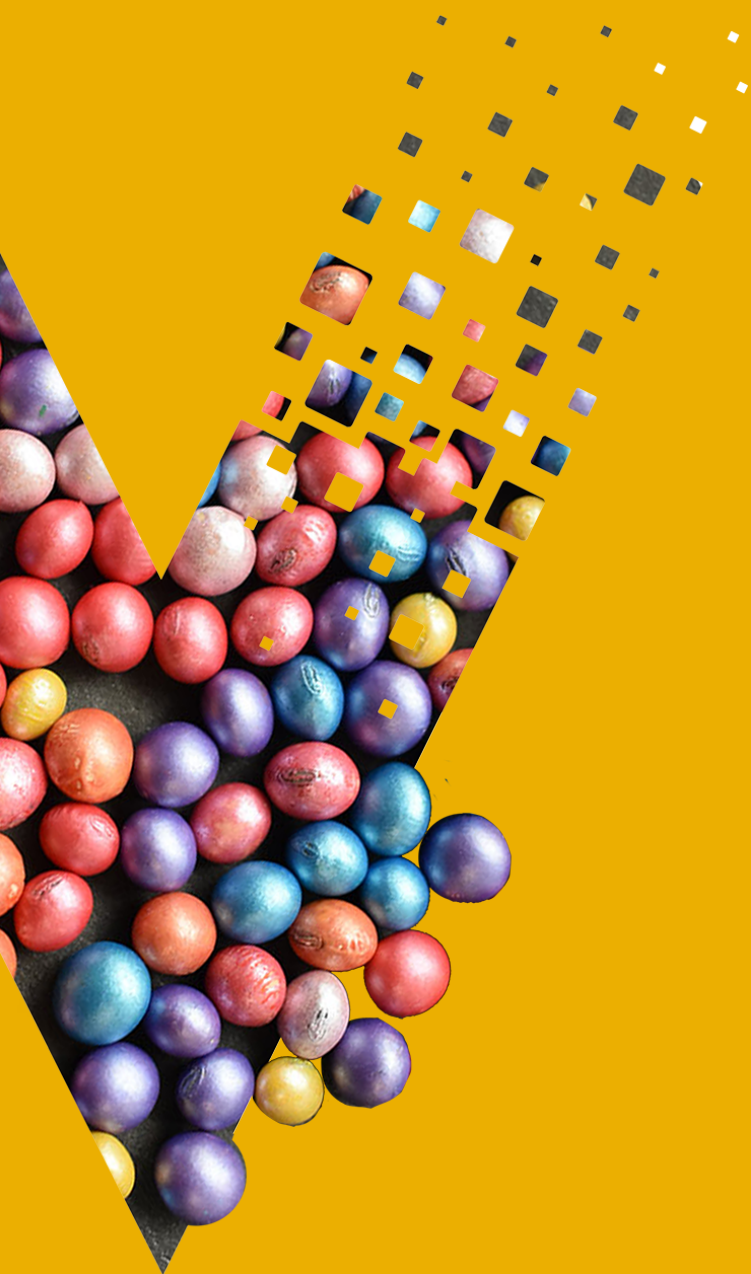

- Akasprout colorants listed on the EPA Tradename Database.
 - Improves film formation which significantly reduces dusting.
 - Reduces bridging with no reduction in flowability.
 - Complete line of approved colors and liquid special effect pearlescents.
- Long term dispersion stability with little to no settling.
 - Long shelf life & in-can stability with your active ingredients
 - Non-staining & incredibly easy clean-up of equipment.
 - Special development and tailor-made colorant formulations available.

AkaSprout Shine Colored Polymers

Akasprout Shine Colored Polymers are perfectly balanced formulas utilizing two truly unique products; Akasprout Colorants and Akasprout Pearl. Built to minimize blending and maximize efficiency, this product line adds shine, increases visual appeal while also improving dust off with no effect on flowability. Akasprout Shine Colored Polymers can be used on a wide variety of seed types and provides the same unique benefits to your treatment and seed as our traditional Akasprout line, all in one easy to use formula.
